

GLOW CUSTOMIZATION

FORM & FUNCTION 800

" A world of possibilities in Crystal Lighting"

Creating a custom-designed, contemporary, crystal light fixture to perfectly suit a setting can be costly and time-consuming for you. The process generally takes months from conception to installation.

GLOW® Lighting solves this challenge by providing a unique modular lighting system which gives you the ability to innovate and adapt the lighting to suit the need in a timely and cost-effective manner.

Design Platform

The Form & Function lighting system is a series of modular frames that have the ability to connect to each other to create an unlimited number of designs without restrictions or limitations. The frames may be mounted close to the ceiling or suspended. You can use Form & Function to create ovals, serpentine, race tracks, or any abstract pattern. A wide selection of crystal and shell trimmings are available to achieve the finished appearance.

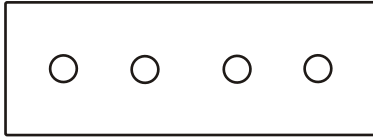

We invite you to create lighting that is uniquely yours.

A world of possibilities in Crystal Lighting

Form & Function 800
